

HEAD OF CLINICAL AFFAIRS

There is no label for what we do at AlgoDx - because no one has built what we are building. We bring AI to intensive care to help save lives and improve cost-effectiveness in healthcare. Our journey began in 2018 and we are looking to grow our team with an experienced Head of Clinical Affairs that will lead AlgoDx's medical affairs strategy. Apart from education and relevant experience, you must have every quality of a self-motivated leader and possess a strong strategic and business acumen. In this role, you will liaise with key opinion leaders, drive the clinical strategy and be responsible for planning international clinical projects.

The ideal candidate for this role will have a solid scientific understanding and knowledge of intensive care. You have experience from medical device development including development and execution of clinical evaluation strategies, clinical trial activities and knowledge of applicable regulatory guidelines and standards.

Responsibilities

- Being a medical expert in the field of relevant disease areas by seeking, providing and interpreting scientific medical content in relevant areas
- Contribute with medical input and expertise in assigned cross-functional project teams
- Ensure team contribution for general disease insight, ongoing clinical development and relevant scientific data in given responsible disease areas
- Responsible for internal medical education
- Medical writing and reviews of relevant clinical material such as study protocols, IB, clinical evaluation reports, safety data, manuscripts and posters
- The role will entail many hands-on tasks and responsibilities such as taking the lead in developing, establishing, and implementing the overall clinical governance including processes, structures, and SOPs

Requirements

- MD degree specialized in intensive care/anesthesiology
- Minimum 5 years of relevant experience
- Experience in medical affairs from a global organization or local operating company within in a medical device or pharmaceutical company
- You have demonstrated expert knowledge and comprehensive understanding of applicable GCP, ICH guidelines & FDA and applicable international regulations
- A strong strategic and business mindset
- Ability to convey scientific content and context to different audiences
- Excellent organizational and leadership skills
- Outstanding communication skills in Swedish and English

Benefits

You can be based anywhere in Europe but if you happen to live in the Swedish capital, we offer a great place to work in central Stockholm! You will get the opportunity to be part of a team with highly passionate experts. At AlgoDx you will be offered the possibility to develop in an entrepreneurial organization with a company culture distinguished by a flat hierarchy, innovation and passion.
