DevSecOps

There is no label for what we do at AlgoDx because no one has built what we are building. We bring AI to intensive care to help save lives and reduce healthcare costs.

Our mission was born in 2018 and now, after a series of successful R&D advances and regulatory milestones, we are heading to market. In this phase we are looking to grow our team with an experienced person responsible for **development**, **security**, and **operations**.

Responsibilities

- Continue develop our infrastructure platform.
- Be responsible to implement our strategy to scale the platform and to ensure security.
- Together with rest of the team make sure we are following the prescribed regulations necessary for handling healthcare data.
- Work closely with our outsourced infrastructure team and be part of architectural decisions.
- Uphold our quality and performance standards by making reasoned development decisions.

Requirements

- Very good knowledge in cloud infrastructure and cloud security
- Documented experience in IT security
- Good Linux skills
- Network configurations

Experience with common technologies such as
- Microservice architectures, Kubernetes cluster
- NoSQL, time series databases and PostgreSQL
- Elasticsearch, Kibana
- Redis
- VMware
- Modern DevOps tooling and workflows.

Fluent communication skills in English, we are working closely with international partners and service providers and all documentation are done in English.

It's a plus if you also have previous experience within medtech or healthcare and understanding of medical informatics.

This position is unique since we are just in the beginning of our technical expansion. You will have great opportunities to form the role and influent the next level in our platform setup and choice of techniques and services.

Benefits

You can be based anywhere in Sweden but if you happen to live in the capital we offer a great place to work in central Stockholm! You will get the opportunity to be part of a team with highly passionate experts. At AlgoDx, you will be offered the possibility to develop in an entrepreneurial organization with a company culture distinguished by a flat hierarchy, innovation, and passion.
