Stockholm, Paris, June 30th, 2022

AlgoDx - Best Startup of the Year

AlgoDx, a clinical stage medical software company, has been awarded *Best startup of the year* by OVHcloud, a leading cloud computing provider. This prestigious award accentuates the cutting-edge technology that has been developed and deployed on the cloud by AlgoDx.

- We are very proud to have been selected for this award says Calle Österlind, Chief Information Officer at AlgoDx. Our tech team has worked hard with the NAVOY® Platform that consists of a central cloud computing platform running machine learning predictions for intensive care. This is really a demanding undertaking given the 24/7 performance and security demands in the clinical environment of our customers.

OVHcloud is a global player and the leading European cloud provider with 1.6 million customers worldwide served by 33 global water-cooled data centres. OVHcloud also runs a global Startup Program which assists startups and scaleups with up to €100k in free cloud credits and one-on-one technical support.

- We congratulate AlgoDx for the *Best Startup of the Year award 2021* which we award every year to a startup that has demonstrated a high level of tech innovation and significant use of our cloud environment and Startup Program, says Philip Marais, Global Start-Up Program Leader at OVHcloud.

About AlgoDx

AlgoDx is a Swedish clinical stage medical software company developing a portfolio of novel machine learning algorithms that can predict disease or worsening of disease. Focus areas include sepsis and acute kidney injury in intensive care, and inflammatory bowel disease in outpatient setting.
